

Electrical Engineering Intern

We are currently seeking a Part-Time Electrical Engineering Intern.

Qualifications:

- Must be 18 years of age or older.
- Must be currently authorized to work in the United States.
- Must be pursuing or have a degree in Electrical Engineering.
- Sophomore student standing or higher required.
- Must be able to operate computers and various software programs proficiently, including AutoCAD.
- Work with various internal and external teams while on job-site.
- Must be able to communicate fluently and effectively, both written and verbally.
- Must be detail-oriented, well organized, and possess excellent follow-up skills.
- Must be self-motivated, able to multi-task, and work independently
- Ability to read and interpret electrical plans, specs, contracts, proposals, estimates, and other regularly encountered items.
- Must have knowledge of electric distribution and transmission system design, operation and maintenance, safety practices, and techniques for electrical operations.

Responsibilities:

- Assist in the design, construction, maintenance, and operation of electrical system facilities.
- Communicating with members and project resources (subcontractors, vendors, trades) and document discussions, outcomes, and decisions.
- Coordinates and assures all permits, easements, licenses, and other correspondence are secured in a timely fashion where required.
- Assists the Warehouse Coordinator in ensuring material, supplies, and equipment are purchased to construct and maintain the cooperative's distribution and transmission facilities and equipment.
